

hatchling

a chick grows inside the egg
the chick grows bigger inside the egg as the hen sits on them

egg

the egg begins to hatch
the chick starts to hatch from the egg using a special egg tooth to break out of the shell

chick

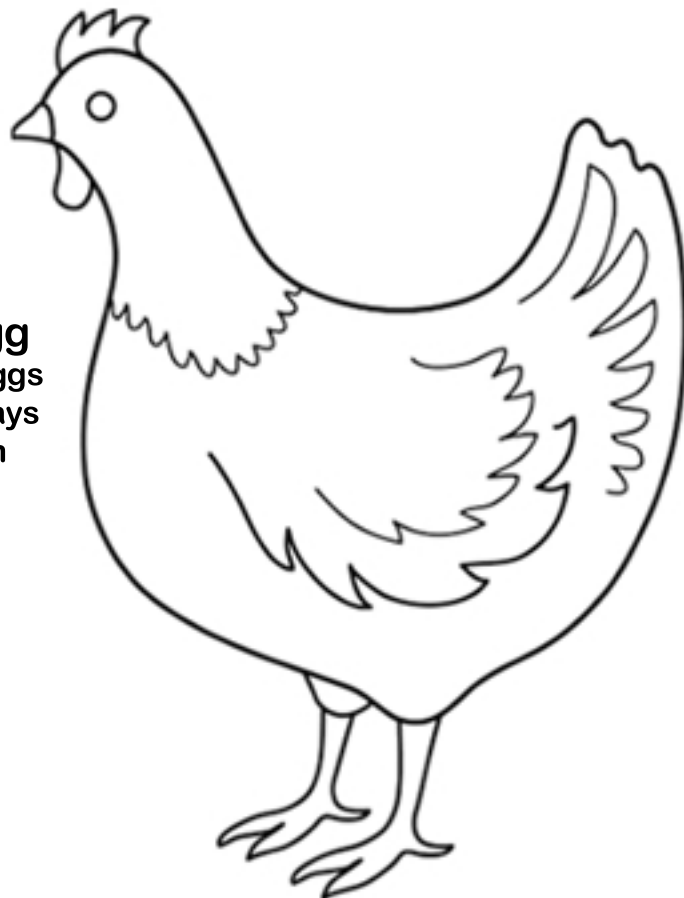

the hen lays an egg
she will lay a clutch of eggs
and sit on them for 21 days
to keep the eggs warm

the chick grows
the fluffy chick will
soon grow bigger and
grow its adult feathers

if the chick is a female
she will become a hen
and lay her own eggs

adult chicken

Lifecycle of a chicken
